

## *Solution Driven, By Design.*

With more than a decade of implementation/upgrade/support experience, 3Di has provided comprehensive IT solutions to 200+ clients around the world in public and private sectors. Our goal is to deliver an innovative, complete, and integrated solution to achieve your city's goals while minimizing risk, reducing total cost of ownership, and capitalizing on your current IT investments.

3Di's expertise highlights include, but are not limited to:

### **Microsoft Solutions**

3Di is a Microsoft Gold Partner.

3Di has delivered a number of systems that integrate Microsoft technologies, involving .NET, SQL, SharePoint, Azure Cloud and other Microsoft technologies.

### **Oracle Enterprise Solutions**

3Di is an Oracle Gold Partner.

We provide application development, implementation, integration, strategy and upgrade solutions, leveraging Oracle products, such as Oracle WebCenter Suite (Portal, Content, and Sites), Business Process Management (BPM), Identity and Access Management (IDM), Service Oriented Architecture (SOA), Oracle Database, Oracle Cloud solutions, and several other Oracle products.

### **Mobility Solutions**

3Di offers a portfolio of tools and services to develop your enterprise mobility strategies so you can unlock new business models and innovative products and solutions for your organization. Our SMAC (Social, Mobile, Analytics and Cloud) focused development approach delivers more holistic and competitive solutions. At 3Di, we craft out our detail and dedicated strategies for UX (User Experience), design, execution and QA (Quality Assurance).

### **Software as a Service (SaaS)**

3Di recognizes that SaaS and Cloud Computing are rapidly becoming viable options for application delivery in public and enterprise computing environments. From our extensive public sector experience, we have developed fully scalable solutions for citizen engagement, fire inspection, emergency preparedness, building information, and more.

### **Open Source Solutions (OSS)**

From applications development for Google's open source mobile platform Android to developing complex web portals using open source technologies such as PHP, Apache and Tomcat, 3Di has delivered a number of successful open source systems.

### **Service Oriented Architecture (SOA)**

SOA has revolutionized systems integration. SOA allows integration of widely disparate applications on multiple implementation platforms. 3Di helps enterprise clients architect their business applications and processes using SOA to maximize performance.

Our objective is to cultivate long-term partnerships with our customers and we share this commitment to help improve their systems and processes. We welcome the opportunity to develop this type of relationship with your city.
